Sirs—

I have heard from Rep. Redfield (Paradise Valley). He is complimentary of the current brucellosis-related efforts that include the late season dispersal hunts in Regions 3 and 5. I also understand he is interested in a summer meeting with landowners to talk about an extended cow hunt. Not really sure if this means the next iteration of dispersal hunts or an antlerless elk hunt that is defined more within the context of biennial season setting. Regardless, something we should visit on—for now I offer this as an FYI for you to contemplate and prepare for any next conversation we need to have. Please forward to your staff as you see fit. Obviously one possibility here is an interaction with the 5-week season discussion.

Thanks and sorry,
Q
